★ Ampeg Accordiamp Series

THE AMPEG ACCORDIAMP SERIES has enjoyed a most enthusiastic acceptance by all who have heard it, as well as the top pros who have tried it. The magnitude of tone and volume below the feedback level is so great that even the laymen appreciate it and refer to it as a beautiful organ. Professionals invariably say it is without equal in SOUND, and rave about the absence of feedback. Now with the NEW AMPEG TRUE ORGAN VIBRATO a trial or a listen is certain to convince you of its absolute superiority. . . those who want the best, in preference to low price, should by all means hear and try the new RHAPSODY. In the more modest price class the new JUPITER will afford a pleasant surprise.

For top performance with any amplifier do not underestimate the importance of the AMPEG FACTORY INSTALLED FIVE MIC. STEREO PICKUP.
